

## **Dynamics of Foreign Investments in India**

\* Kavita G. Kalkoti

### *Abstract*

*Foreign direct investment (FDI) into India by US firms is roughly half the amount of the money spent by Indian students by way of payments to US colleges and universities. In 2015, US firms invested \$1.8 billion in India while 1.3 lakh Indian students paid \$3.6 billion to various US colleges. In the year before, USA Inc. invested \$0.8 billion in India as compared to \$3.3 billion spent by a little over 1 lakh Indian students. This was reported in the article, "US FDI in India half what Indians pay for college", in the Financial Express. This set the ball rolling for this research paper.*

*The objectives of this paper is*

- *To study investment flows into and from India*
- *To understand trends in FDI flows in the world and India*
- *To study trends in Major Stock Indices*

*On the basis of the analysis and understanding of the above objectives the researcher has made recommendations that will help policy makers and businesses. The paper takes a macro view of the issue at hand. As due to globalisation nowadays the world is the stage. Simple statistical tools are used in the paper.*

**Keywords:** Investment, trends, stocks, India
