

Environmental Protection – Facts and Figure

* Roshan Khobragade

Abstract

India has a vast amount of flora and fauna with a very massive biodiversity. The figures are very impressive but the facts are grim. All over the earth we are facing the problem of global warming. The situation in India is worse with India competing with China on the level of pollution in some cities. India is a signatory to some conventions for the protection of the environment. India is also a signatory of the Convention of Biological Diversity. Accordingly India has taken measures for the protection of Biodiversity and reducing the level of pollution. India has taken steps for monitoring and reviewing implementation of protection of Biodiversity. There are many cases in which the Supreme Court and the High Court have given orders for the protection of environment. Even then, the Government of India is diverting lots of land for non forest purpose. Also there are many technical problems faced by the SPCB/CPCB in implementing of the Environmental Law. The Companies Act 2013 has taken measures through CSR for the protection of the environment. Some companies have taken steps for the protection of the environment through the mechanism of CSR
