Abstract

Education is the backbone of every country. A country will not be able to survive in the competitive world, if its education system is not capable of contributing for its development. Indian education system has been widely criticized for its failure to create required employability of the students according to the industry requirements and its inability to contribute to inclusive growth of the nation as a whole. This paper attempts to highlight the issues and provide some solutions to resolve them. The study uses secondary data from various available sources. The researcher presumes that the issues in the present education system that are daunting the growth of this country can be tackled effectively if constructive and committed actions are taken by the Government to resolve them.

Keywords: *Education system, Govt. Issues, Quality, Solution*
